Entrepreneurship / Startup Initiative

Project Name: Career Guidance & Skill Development Platform (*In Progress*)  **Role:** Founder & Developer

Description:

Currently developing an AI-powered **career guidance platform** that enables users to explore emerging job roles, match with hiring companies, and identify **skill gaps**. The system provides structured learning resources, both free and paid, to help users bridge these gaps efficiently. Through an **assessment phase**, users validate their skills by ticking off completed learning modules and submitting practical projects. The platform aims to simplify career decision-making and professional growth through **data-driven insights** and personalized career pathways.
